LAB12 TRUE Handcrafted Passive Attenuator / Line Input Selector

IT IS YOURS!

Thank you for selecting the LAB12 TRUE, a simple but really musical passive attenuator for your audiophile system. TRUE is designed to keep every detail of this low level sensitive signal unaffected from your source to your power amplifier. Connect TRUE to your system, give some playing hours to meet each other with your system devices and finally enjoy the music. Because at the end this is the only thing we are looking for...

Before setting up your new TRUE, we encourage you to read this manual thoroughly to properly acquaint yourself with its features. We love music and audio devices, we build your new device with emotion and personal treatment.

The information contained in this manual is subject to change without notice. The most current version of this manual is available on our official website at <http://www.lab12.gr>

LAB12 TRUE Handcrafted Passive Attenuator / Line Input Selector

LAB12 TRUE Handcrafted Passive Attenuator / Line Input Selector

Front Panel

TRUE Front panel

At front panel you will find, input selector (1) and level attenuator (2).

- (1) You can select the desired input (3 positions)
- (2) You can adjust the desired level input

LAB12 TRUE Handcrafted Passive Attenuator / Line Input Selector

Rear Panel

TRUE Rear panel

In rear panel you will find the connection inputs and outputs.

On the left side you will find the output to your power amplifier.
On the right side there are the three pairs of inputs.

The 3 position switch on the middle of the back panel give you 3 choices about signal ground.

Position 1 Both channels keep common ground and both are connected to the chassis of TRUE

Position 2 Channel A and Channel B keep separate ground to output A and B without connection to TRUE chassis

Position 3 Both channels keep common ground to outputs without connection to TRUE chassis

For the safety of your equipment

! Make sure that all of your equipment is turned off before any connection.
